## Technical specifications

### Usage

RigiProfil MultiTec is the efficient system profile from Rigips, which is used to create substructures in plasterboard systems. A special feature of RigiProfil is the special MultiTec surface structure, which offers a variety of advantages in sound insulation and processing. RigiProfil complies with the requirements of DIN 18182-1 and DIN EN 14195 and is manufactured from steel of the grade DX51D+Z (material no. 1.0226) by cold forming. RigiProfil MultiTec has an H-punching, which is located at a distance of 350 mm from the profile ends. The geometry of the profile allows nesting.
